Re: Ex Parte Notice in ET Docket No. 10-28

Dear Ms. Dortch:

Pursuant to § 1.1206(b) of the Commission's Rules, this letter serves to notify the Commission that on Tuesday, October 11, 2011, Arik Fux of Xsight Systems Ltd. ("Xsight"), Ralph Mixon of Science Applications International Corporation, and the undersigned counsel to Xsight met with the following members of the Office of Engineering and Technology:

Julius Knapp	Aamer Zain
Bruce Romano	Geraldine Matise
Mark Settle	Ira Keltz
Karen Ansari	

Xsight specializes in electro-optical and radar sensing technologies for airports and transportation, security, and safety applications. Its flagship product is FODetect®, an innovative system that operates in the 76.0-77.0 GHz band to monitor civil and military airport travel surfaces (runways and taxiways) and detect foreign object debris ("FOD"). FODetect has undergone a successful evaluation installation in Boston Logan International airport and is ready for deployment at additional airports in the US and around the globe.

At the meeting, we reiterated our position as set forth in Xsight's Reply Comments filed on August 1, 2011 supporting the views of various members of the automotive industry that the FCC should amend the Part 15 rules to accommodate their requests and urging the FCC to make the necessary changes to allow Era Systems ("Era") and other providers of airport safety systems to deploy fixed location radars in the 76-77 GHz band in airports, including installations near runways and taxiways. We noted that allowing providers of airport safety systems to deploy fixed location radars in the 76-77 GHz band in airports would not

present any interference issues and that no commenter in the present proceeding has objected to Xsight's or Era's requests to permit such fixed installations.

Very truly yours,

*/s/ Brian D. Weimer*
